

Welcome to MyProj

Table of contents

1	Congratulations.....	2
2	Using examples as templates.....	2

1. Congratulations

You have successfully generated and rendered an [Apache Forrest](#) site. This page is from the site template. It is found in `src/documentation/content/xdocs/index.xml`. Please edit it and replace this text with content of your own.

2. Using examples as templates

This demo site has many examples. See the menu at the left. The sources for these examples are in the directory `src/documentation/content/xdocs/`

The sources for the Apache Forrest website are also included in your distribution at `$FORREST_HOME/site-author/`

You can also extend the functionality of Forrest via [plugins](#), these will often come with more samples for you to out.
